

WM016 - Wet Mustard Bucket Processing – 10kg

Revision Number	7
Issue Date	09.05.25
Reasons for Issue	Added Pallean serial number

These records have been identified under HACCP as OPRP and QCP and must be completed correctly

Date of Packing		Operator(s)		
Product Description		Shift		
Product Code		MO Number		
BBE Date matches Winman Y/N *PLANNING DEP TO COMPLETE				
Bulk mustard (Intermediate product) used for packing into buckets - Record batch code & MO from IBC ticket				
IBC 1	Batch code = MO = Pallecon Serial No=	Time on	Time off	IBC 5 Batch code = MO = Pallecon Serial No=
IBC 2	Batch code = MO = Pallecon Serial No=	Time on	Time off	IBC 6 Batch code = MO = Pallecon Serial No=
IBC 3	Batch code = MO = Pallecon Serial No=	Time on	Time off	IBC 7 Batch code = MO = Pallecon Serial No=
IBC 4	Batch code = MO = Pallecon Serial No=	Time on	Time off	IBC 8 Batch code = MO = Pallecon Serial No=
START UP CHECKS	Unit Pack		Start-up checks, checked by both operators & sign	
	Date code	BBE	Print name	
Operator 1 (record information)				
Operator 2 (record information)				

Start of run label sample

End of run label sample

ON PRODUCT CHANGEOVER - Initial box to confirm all product and packaging has been removed from previous production run.														
Every hour - take one bucket / lid from the line, and inspect for the following: Answer yes, no or answer questions.														
	Time													
Bucket & Lid	Is the bucket clean & in good condition? (inside and out)													
	Is the lid clean & in good condition? (both sides)													
	Are the lids secure on the buckets?													
	Is the lid tamper in place and in good condition?													
Labels	Are the labels correct for the product being packed?													
	Is the print on the labels clear and not smudged?													
	Is the lot code on the labels correct?													
Filler	Is the filler nozzle clean with no drips?													
	Are the buckets filled cleanly with no messy fills													

Every hour - take six filled buckets from the line and check the fill weight												
Sample size 6 per hour T1 = 9,850 g T2 = 9,700g No more than 1 in 40 can be less than T1 No packs must weigh below T2
